## Knowing how your website or application performs is critical to your success.

The world's web users – from digital surfers to game sharks, media addicts and online shoppers – all demand a near instantaneous experience from any device, at any time. When your business and good name depend upon peak performance, downtime is never an option. Apica gives your team the tools necessary to ensure the highest availability and world-class performance. Always uphold your SLA by pro-actively monitoring your most important digital assets from your end-user's perspective.

## Highly Customizable

Apica brings together an unmatched global testing and monitoring network with an easy-to-use, fully-integrated SaaS platform. Run customizable performance health checks and access meaningful testing metrics anywhere, on any device. Custom Selenium and automated scripts allow our clients to create and test unique user scenarios across real web browsers, in real time. The result? User-centric insights into application functionality, server performance, and eCommerce transactions.

## 360 Degree Visibility

Our monitoring network is built on an industry-leading global backbone of 190+ testing locations in over 75 countries. In addition, we offer a powerful inside agent to provide even deeper visibility into system CPU, memory, disk usage and network health.

Our platform provides API integration support for leading APM, cloud, CDN, analytics, and alerting solutions including AppDynamics, Microsoft Azure, Akamai, Google Analytics, Pager Duty, and more. These metrics are then correlated directly with Apica data providing you an unprecedented view into your website or application.

## Complete Web & Mobile Monitoring

### Fixed-Price Service Plan

Unlimited checks for a single competitive price

### Unparalleled Global Reach

190+ monitoring locations in over 75 countries

### User-friendly UI

Responsive mobile accessibility, drag-and-drop interface

### Powerful Scripting Engine

Selenium script support, real browser execution, and advanced user-scenario analysis

### Detailed Reporting

Intuitive reports, real-time data, and performance recommendations

## Monitoring You'll Actually Use

The Apica monitoring portal is built with you in mind. Our user-friendly, responsive, drag and drop interface is easy to learn, efficient to use, and loaded with customizable options.

Apica provides the most comprehensive information available for resolving performance concerns as they arise and infrastructure planning as your business evolves.

Be in control of your success; achieve peak performance.
